

Protective suit MARS

Light protective suit for use in zones with particulate radioactive contamination or against risk from infectious agents.

The suit is made of gas and liquid impermeable material and is equipped with integrated gloves, feet and hood.

Due to the air tightness of the material and its welding seams, this suit is offering the highest protection, against both radioactive contamination (protective factor > 50'000) and biological risk (class 6).

For an optimal air distribution, we propose the approved COLT-VENTO ventilating system (s. Product info 04404).

The suit is made of robust film material and is foreseen for one way use.

- As 1-piece combi or in 2-piece design (pants and jacket) available.
- The 1-piece combi comes with cross zipper in the back.
- Available with foil hands or welded gloves.
- Material: Polyvinylchloride (PVC), Color: white.
- Standards: EN 1073-1: Protective clothing against particulate radioactive contamination.
EN 14126: Protective clothing against infective agents.

Available sizes and designs:

Item no.	Size	Description
100709	---	2-piece (pants and jacket), with foil hands
100711	---	2-piece (pants and jacket), with welded gloves size L
100725	M	1-piece combi size M with welded gloves size L
100726	L	1-piece combi size L with welded gloves size L
102757	XL	1-piece combi size XL with welded gloves size XL
113028	XL	1-piece combi size XL with welded gloves size L
103315	XXL	1-piece combi size XXL with welded gloves size XL
