Single-filter full-face mask

This X-plore 6570 single-filter full-face mask consists of a mask body made of skin-friendly silicone, the X-plore 6530 of EPDM. The large-area lens is made of polycarbonate for high impact resistance, high bending elasticity and low weight, and of Triplex laminated safety glass for use in extreme conditions. Double stainless steel tensioning frame with triple sealing line. Comfortable five-point strap for easy and quick donning of the mask. Standard round thread connection Rd40.

The single filter full face mask with PC visor has the fire department approval.

For the masks there are suitable accessories such as the mask glasses or carrying box.

A wide range of suitable filters can be used with the Rd40 round thread connection.

EPDM/Triplex

Silicone/PC   *Silicone/Triplex*

Mask glasses   *Rd40-Filter*
