

Pipe protection caps

During maintenance, repairing or dismantling works, the open ends of flanges, pipes, tubes, ports or valves have to be protected against the entry of foreign materials.

The pipe protection caps were developed to comply with the Foreign Material Exclusion (FME) process and are used in the nuclear industry as well as in the chemical and pharmaceutical division. They are easily attached by pulling over the flange. The stitched elastic ribbon assures an optimized fit and an excellent fixation. The Protective Covers are not air-tight and allow the pressure equalization between inside and outside of the pipe.

- Material: 100% Cotton
- Colors: red, blue, green, yellow, white
- washable up to 90° C
- with dimension indicating labels
- Diameter D from 40...800 mm
- Height H from 40...200 mm

Other materials / dimensions / labels on request.

Typical standard dimensions:

D = 40...100 mm in steps of 10 mm,

D = 100...800 mm in steps of 50 mm,

H = 40...200 mm in steps of 5 mm.

Other dimensions on request.
