

## Working apron

Lightweight non-ventilated working apron to protect against splash water, dripping wetness and weakly aggressive cleaning, that act on the user from the front side.

The working apron is made of robust, combustible film material and is suitable for any kind of decontamination-, cleaning- and maintenance works.

- available in various designs and materials.
- can be worn in combination with protective suits.
- protects the entire body front from the neck to below knee.
- with welded gloves.
- available in different lace variants.
- material: Ethylene Vinyl Acetate (EVA), combustible, color: white
- weight: about 400 g / pc.

The working apron is a personal protection equipment (PPE) according to Regulation (EU) 2016/425 (classification: category I).

The used materials fulfill the following approvals:

- DIN EN 1073-2:2002 non-ventilated protective clothing against particulate radioactive contamination
- DIN EN 14126 Corrigenda 1:2005 Protective clothing against infectious agents
- DIN EN 14605:2009 Protective clothing against chemicals
