

Decont pad

The decont pad is a highly absorbent cleaning cloth with high absorption and retention for liquids and particles.

It is used for efficient cleaning of surfaces such as floors, walls, pipes, fittings and the like.

The needle fleece made of polyester and viscose fibers (PES / VI) was gradually high-temperature-solidified.

Properties:

- thickness 5 mm
- tear-resistant, flexible and supple
- cleanly punched, low in fuzz, no fraying
- free of chlorine
- good sliding properties
- can also be used as a wipe test for sampling
- packing: 500 pcs. per box

Item-no.	Decont pad dimension
